

JOHN PATRICK BORABO

Automation & Data Systems Specialist | AI-Assisted Automation

Jaypeeborabo81@gmail.com | 09666973287 | Antipolo City, Philippines | borabo-jp.github.io

SUMMARY

Automation and data-systems engineer with 8+ years in data and reporting. I currently build and operate the internal tooling stack for a digital agency — three production desktop applications with over 750 automated tests between them, scheduled automation pipelines, and a cloud-based catalog alerting service — on top of a BigQuery and SQL Server warehouse with Power BI, MS Access, and Google Sheets reporting layers, using AI-assisted development (Claude) to build and ship faster. I ship systems that keep running, not one-off reports.

WORK EXPERIENCE

Automation & Data Systems Specialist | AMS Management

Feb 2026 – Present

- Built and maintain three internal Windows desktop applications (Electron, TypeScript, React) covering Amazon Sponsored Products campaign generation, search-term cannibalisation auditing, and weekly campaign pausing — over 750 automated tests across the three, sharing one common device-based access-control system.
- Automated the agency's weekly Amazon Ads bid-optimisation cycle — VBA and PowerShell-driven scheduling across the client account fleet, with staged rollout, timestamped backups, and zero failures logged.
- Built a Cloud Run and BigQuery service that diffs daily catalog and inventory state against a rolling history and emails a grouped change digest, piloted on a live seller account.
- Own the BigQuery and SQL Server warehouse and the Power BI / Looker Studio / Google Sheets reporting layer the rest of the tooling stack runs on, plus the agency's public-facing website — using AI coding tools (Claude) as a standard part of the development workflow.

Brand/Data Support Specialist | Intelegencia

Mar 2025 – Jan 2026

- Automated reports via Google Apps Script and macros; managed data extraction from Amazon Seller/Vendor Central for dashboards.
- Researched product trends and maintained data integrity in spreadsheets to support brand strategy presentations.

Reporting Analyst | Alorica

Apr 2024 – Feb 2025

- Built VBA Macros and MS Access solutions to replace legacy Excel sheets, enhancing reporting efficiency.
- Delivered customized Power BI operational reports based on stakeholder requirements and metric analysis.

MIS Reporting Analyst | Ubiquity

Jul 2023 – Apr 2024

- Automated reporting workflows and replaced manual Excel processes by developing custom VBA Macros and MS Access databases.
- Generated and analyzed daily operational metric reports using Power BI, collaborating with stakeholders to define requirements and deliver customized solutions.

Business Insights Analyst | Ubiquity

Jun 2022 – Feb 2023

- Translated analytical findings into actionable business insights and data visualizations for client presentations.
- Ensured report accuracy and drove process improvements while communicating recommendations directly to stakeholders.

Operational Risk Analyst | Ubiquity

Jan 2022 – Jun 2022

- Investigated and resolved payment claims, specifically handling Regulations E & Z disputes and VISA/STAR chargebacks.
- Validated disputes with merchants and utilized available resources to make decisions on case approvals or denials within required timeframes.

MIS Reporting Analyst | TechMahindra

Apr 2019 – Oct 2021

- Developed automated reports using Excel Macros and maintained dashboards to track call center performance.
- Managed real-time inbound call traffic across multiple locations and conducted ad-hoc analysis to enable business decisions.

Escalation Specialist | TechMahindra

Oct 2018 – Apr 2019

- Investigated and resolved complex customer complaints while documenting guidelines for process improvement.
- Trained new agents on call handling efficiency and provided support during high-volume periods.

Customer Service Associate | TechMahindra

Mar 2017 – Oct 2018

- Resolved technical and account-related inquiries for Globe Telecom services, ensuring accurate documentation of all interactions.

EDUCATION

Bachelor of Science in Information Technology

Jun 2013 – Oct 2016

IETI Marikina

4th Year College Undergraduate

KEY SKILLS

Amazon Ads Tooling: Campaign generation & bulk file automation, bid optimisation automation, search-term cannibalisation auditing, campaign pause automation, catalog change alerting.

Application Development: Electron, TypeScript, React, Python, automated testing (750+ tests shipped across three production desktop apps).

AI-Assisted Automation: Claude and AI coding agents used as a standard part of building, testing, and shipping the tooling above.

Data Automation: VBA Macros, Google Apps Script, PowerShell, SQL, Microsoft SQL Server, MS Access, Power Query.

Data Warehousing & Cloud: BigQuery, Microsoft SQL Server, Google Cloud Run, Cloud Scheduler.

Reporting & BI: Excel, Google Sheets, Power BI, Looker Studio.

Process & Reliability: Staged rollouts, access-control design, idempotent scheduled automation, documentation and SOPs for non-technical operators.
